

Pre-k through Kindergarten  
Fishing for Numbers and Letters

Number and Letter Matching

Print on card stock and cut out pictures.  
*There are fishing poles to match each fish.*  
(Laminate or wax cards to make them more durable.)

Tell your children that you are fishing for letters or numbers. This activity will be a fun way to learn letters and numbers.

Numbers: There are two ways to do the numbers. You may simply match the numbers, or for more difficult levels, count and match to the correct number.

Letters: There are also two levels with the alphabet. Matching to the same letter or matching capital letters to lowercase letters.

Helpful Hint:

If your child is a beginner, start them off with three matching cards and slowly build up until they can match every card.
